DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/14/2006 has been entered.

Claim Rejections - 35 USC § 112

Claims 21-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The limitation "at least about 1 Gohm" is new matter. While the original specification did support the limitation "high resistance (Giga Ohm)" it does not support the "at least about" limitation and thus this is new matter.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 & 19-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

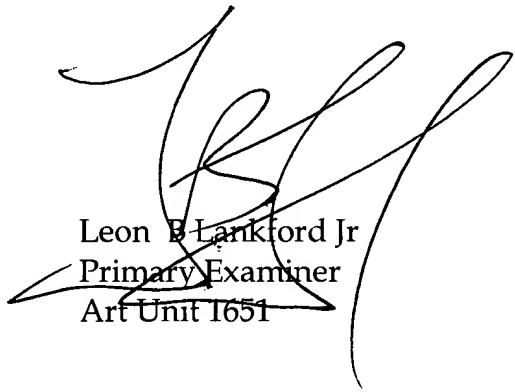

The term "high" renders the claims indefinite because the metes and bounds of this limitation are unclear and thus the scope of the claims is unclear.

Applicant has argued that the cited prior art teach what high resistance means in this art, however it is not readily apparent that the prior art explicitly defines "high resistance" in the patch clamp art and thus the claims must still be considered indefinite. Even if the office were to look to applicant's arguments to determine the meaning of the instant limitation it would not be clear because applicant appears to allege that high resistance is a Gohm on one hand and about a Gohm in the other hand.
